## Introducing TASKI IntelliFlow, an automated solution flow technology certified to save chemical and water.

With TASKI IntelliFlow solution flow technology, water and chemical consumption are optimized by 76% on daily floor cleaning\*. Clean longer with less downtime while using the precise amount of water and chemical for quality results. Ensure environmental and business operational sustainability with TASKI IntelliFlow.

\* Underwriters Laboratories validated TASKI floor scrubbers with IntelliFlow saved an average of 76 percent water and chemicals compared to floor scrubbers without IntelliFlow.

Without TASKI IntelliFlow, solution is delivered unevenly. As the machine slows in turns, more solution is released per square foot, causing slippery puddles, wasted supplies and more frequent and time wasting tank refills.

Savings at every turn with TASKI IntelliFlow. Save water, chemical, labor and on slips and falls!

### The TASKI advantage

- Immediate drying lowers accident risk
- Concealed batteries provide safe use
- Consistent performance protects brands
- 76% water and chemical savings lower operation costs\*
- 30 - 40% fewer parts for simplicity
- Ease-of-use for simple, fast on boarding
- Superior maneuverability and ergonomics increase user comfort and productivity
