

TASKI[®]The **ULTIMATE**
Cleaning Machines™

Mechanical cleaning sets the highest cleaning standard*

Where are you in the evolution of cleaning?

				
Hand scrubbing brush and bucket	Sweeping brooms, mops and buckets	Vacuum cleaners and single-disc machines	Combined scrubber-driers	Ride-on cleaning machines

Are you stuck with out dated, inefficient and unhygienic mops?

Here is why machines are so much better than mopping

- ✓ **For those who want the ultimate cleaning result** - Compared to mopping, mechanical cleaning is superior in very aspect in achieving cleaning excellence.
- ✓ **Improved speed** - Taking up less valuable cleaning time so you can focus on higher risk or more valued cleaning tasks.
- ✓ **Superior cleaning result** - Machines apply more cleaning pressure for a better cleaning result, they work faster and leave floors much drier. All in one automated operation.
- ✓ **Better for your staff** - Machines are more ergonomic and less fatiguing for operatives. They can even chose to ride whilst cleaning!
- ✓ **Safer** - Machines make your working environment safer. Less water = less slips.
- ✓ **Hygienic** - Machines make your working environment more hygienic. Machines remove more soilage. Less soilage = less germs.
- ✓ **Lower costs & less waste** - Machines use less water and less chemicals. Safer + less cost = simply way better!

Here are the simple facts

65% improvement in water recovery
= SAFER FLOORS

5X more soilage removed, **10X** more pressure
= CLEANER FLOORS

180% improvement in productivity
= LESS TIME

Now more than ever your work environment needs to be cleaned to the highest hygiene and safety standards. No compromises.

Contact your Diversey representative to see for yourself just how mechanical cleaning can make your environment cleaner, more hygienic and much safer for you and your colleagues.
