

TASKI

The **ULTIMATE**
Cleaning Machines™

Food Service & Contract Catering

TASKI machine solutions uphold the highest standards of hygiene and first impressions.

Customer Experience

You work hard to create a memorable experience for your diners. You know how customers value a clean and hygienic establishment. First impressions count, make a change and mechanise your floor cleaning, it will transform the appearance of your floors and your diners will really notice.

Brand Protection

Pride in your establishment and brand reputation mean everything. We'll help you boost your TripAdvisor score with immaculate guest washrooms and safe and spotless kitchen and food preparation areas that will pass any audit.

People & Safety

You want to protect your diners whilst safeguarding your brand. Scrubber driers apply 10 x more cleaning pressure, remove 5 x more soilage and 65% more water than a mop. We have ultra-compact battery scrubber driers to safely deal with spillages and cordless vacuums to ensure the highest hygiene standards. Less soilage = less germs. Less water = drier, safer floors that stay clean longer. No cable to worry about means you can clean whenever. Time to throw away the mop!

Operational Efficiency

After a busy service make cleaning up effortless with our ultra-compact battery powered machines. Increase operational efficiency and spend less time cleaning. That means more time for what really matters, looking after your diners and guaranteeing their return.

Sustainability

As a responsible business you want to reduce your impact on the environment. Sustainability doesn't only mean Green, at TASKI it's Orange. Sustainability is at the heart of everything we do. It comes natural to us at TASKI. We have technologies which reduce utilities up to 76%, less energy, less water, less consumables, less chemicals. Our vacuums reduce energy consumption, saving as much as 40 Euros per year per vacuum. That's more profit for you whilst still being more sustainable.

Signature products created with you in mind.

Spend less time cleaning and more time on your core business.

Transform your cleaning for improved productivity & cleaning excellence.

Mechanise your floor cleaning - time to throw away the mop!
