

TASKI[®]

The **ULTIMATE**
Cleaning Machines[™]

Hospitality

TASKI machine solutions for improved guest experience, reduced impact on the environment and protection for your brand.

Guest Experience

You work hard to create a memorable experience for your guests and you know how much they value a clean and hygienic establishment. First impressions count so make the change and mechanise your floor cleaning, it will transform the appearance of your floors. Your guests will really notice the difference which will keep them coming back.

Sustainability

As a responsible business you want to reduce your impact on the environment. Sustainability doesn't only mean Green, at TASKI it's Orange. Sustainability is at the heart of everything we do. Reduced utilities means less energy, less water, less consumables, less chemicals. Our vacuums reduce energy consumption, saving as much as 40 Euros per year per vacuum. Our technologies all add up to help you meet your sustainability goals. By choosing TASKI we'll even help you share evidence proving you make sustainable choices for your guests.

Asset Protection

You are proud of your establishment, your reputation means everything. Protect your valuable floors, carpets and fabrics while improving appearance. We'll help you boost your TripAdvisor score. TASKI machines will keep public areas immaculate and your guest bedrooms and washrooms spotless. TASKI ultra compact scrubber driers will keep kitchen and food preparation areas hygienic and safe ensuring they pass any audit.

People & Safety

You want to protect your guests whilst safeguarding your brand. Scrubber driers apply 10 x more cleaning pressure, remove 5 x more soilage and 65% more water than a mop. We have ultra-compact battery scrubber driers to safely deal with spillages and cordless vacuums to ensure the highest hygiene standards. Less soilage = less germs. Less water = drier, safer floors that stay cleaner longer. Less dust means better indoor air quality for your guests. No cable to worry about means you can clean whenever. Time to switch to battery technology and throw away the mop!

Operational Efficiency

After a busy service and occupancy, make cleaning up effortless with our ultra-compact battery powered machines. Increase operational efficiency and spend less time cleaning. Our Li-Ion powered vacuums and ultra-compact scrubber driers save time in guest bedroom and bathrooms cleaning. That means more time for what really matters, looking after your guests and guaranteeing their return.

Signature products created with you in mind.

Spend less time cleaning and more time on your core business.

Transform your cleaning for improved productivity & cleaning excellence. Mechanise your floor cleaning - time to throw away the mop! Your guests will notice and your housekeeping team will really appreciate it.
